OBJECTIVE

Adaptive Full Stack & Cloud Developer with a passion for solving complex technical challenges. Experienced in designing responsive user interfaces, developing robust backend systems, and deploying scalable cloud infrastructures—proven ability to quickly master new technologies and deliver efficient, production-ready software solutions.

SKILLS

React.js, Node.js, Express.js, MongoDB, Python, C, AWS, HTML, CSS, JavaScript, REST API, Flask, MySQL, Git

EDUCATION

Francis Xavier Engineering College,Tirunelveli	2025 - 2027	MCA	CGPA - 8.3
St.Xavier's College ,Tirunelveli	2022 - 2025	B.Sc CS	CGPA - 7.8

WORK EXPERIENCE

Intern | Mist Software solutions

June 2026 - July 2026

- Developed full-stack web applications using the MERN stack and integrate AWS cloud for Deploy
- Got Hands-on experience of working culture

PROJECTS

Uyir , stray animal rescue coordination platform :

- Full-stack MERN platform with a geo-matching engine, REST APIs, and real-time dashboards coordinating stray animal rescue across citizens, volunteers, and vet clinics.
- A scalable application coordinating multi-role stray animal rescue operations with real-time geo-matching and SLA-based case escalation.

Stocksense , smart cloud based Inventory Management system:

- Full-stack cloud-based Inventory & Sales Management System developed using React.js, Flask, MySQL, and AWS RDS, with secure JWT authentication, REST APIs, and real-time inventory and sales dashboards.
- A scalable business management application supporting product, category, inventory, sales, low-stock alert, and activity log management with cloud database integration and centralized administrative control.
